

IP-VPN MOBILE ACCESS – FACT SHEET

IP-VPN MOBILE SOLUTION FROM INTERNATIONAL CARRIER SALES & SOLUTIONS (ICSS)

To overcome fixed network boundaries or limitations we have launched a service that carrier customers have been missing to offer full flexibility to their clients' Virtual Private Networks: the ability to securely connect from anywhere.

IP-VPN MOBILE ACCESS FROM ICSS

Our ICSS IP VPN Mobile Access solution is a pioneer on the wholesale market. It provides seamless connectivity to customers' Virtual Private Networks using mobile radio access technology from Deutsche Telekom. This is a long-awaited alternative to the usual fixed-line, wholesale IP-VPN service. As with our acknowledged IP-VPN solutions, it makes use of Deutsche Telekom's Multi-Protocol Label Switching (MPLS) global IP backbone, thus ensuring high-performance, stable connectivity.

VALUABLE BENEFITS FROM ONE SOURCE

- The solution allows your customers to connect their hard-to-reach locations – or even establish temporary access.

- It can be quickly and easily integrated into your customers existing VPN service.
- It provides connectivity without geographical limitations, network deployment constraints or implementation time barriers
- The versatile service packages offer predictable, flat-rate pricing based on volume, with scalable usage ranging from 30 to 150 GB per month

THE SETUP

Installing the ICSS IP-VPN Mobile Access solution is extremely simple.

- ICSS provides the VPN configuration and hand over traffic on NNI
- The wholesale customer specifies a VLAN-ID and IP address
- The LAN IP address is configured on the CPE - standard CPE is the Cisco 896VAG-LTE-GA-K9
- Mobile service is received as part of the ordered VPN service across the NNI, just as with any other access type

IP-VPN Mobile Access connection to Deutsche Telekom MPLS network

- ICSS provides the VPN configuration and traffic handover on NNI
- The wholesale customer specifies a VLAN-ID and IP address
- The LAN IP address is configured on the CPE - standard CPE is the Cisco 896VAG-LTE-GA-K9
- Mobile service is received as part of the ordered VPN service across the NNI, just as with any other access type

LIFE IS FOR SHARING.
